

Junior Revit Technician with 1+ years' experience

SD Engineers is seeking a highly organised, enthusiastic, and personable Junior Revit Technician with one to two years of experience to join our dynamic team in our central London location.

This full time position is available to start in April 2025. To apply, please send through your CV and tell us how your skills and experience match our needs.

About SD Engineers

We are a Structural Award winning practice of imaginative engineers collaborating with some of the country's most ambitious architects and clients to deliver the highest quality buildings and infrastructure projects. As creative problem solvers, we help clients realise their designs by truly understanding the narrative and intent behind each project. Our experience as structural and civil engineers allows us to work at all scales and across all typologies, acting as a reliable partner throughout the design and build process. We are committed to delivering low carbon designs and will actively suggest ways to reduce impact on the environment, and undertake carbon counting exercises to justify our approach.

About the role

The Junior Revit Technician should have a basic understanding of construction and Revit modelling. The role involves the creation of 2D and 3D building models, and turning these into clear drawings for contractors and builders to follow. They will support the senior Revit team to deliver multiple projects at once.

Key requirements

The successful candidate will have at least one year of experience using Revit. Exceptional communication skills are a requirement for this role as we collaborate with numerous stakeholders and design disciplines on all projects. Being a reliable and highly organised team player is an essential part of this role to ensure we meet strict deadlines.

The successful candidate will:

- Have a minimum of 1 years' relevant experience
- Be experienced using Revit on a variety of projects
- Communicate well with internal and external teams
- Be highly organised and be able to support on multiple projects at once
- Have a high level of attention to detail and take pride in their work

The following would be advantageous but not essential as training will be provided:

- Experience using AutoCAD
- A working knowledge of BIM
- Qualified to HNC Level

- Knowledge of ISO1950

SD Team Benefits

- Excellent career development opportunities with weekly in-house CPD sessions, monthly training time, and support to gain EngTech with the IStructE or ICE.
- Technology and Cycle to Work salary sacrifice scheme.
